STARKFEST MAXI

CD1-410420100-SMA

INDUSTRIAL GRADE QUALITY WITH ELEGANT DESIGN

The Starkfest Maxi Cash drawer is made of metal to safeguard your bills and coins. It's our biggest model, and yet it has an elegant design in black colour with slightly rounded corners: 410 X 420 X 100 mm. The money trays for both notes and coins are included, 5/8 + 2 media slots. The money trays are made of black ABS Plastic.The cash drawer can be connected to the printer or the POS PC electronical via RJ12. It has a front access 3-position keylock and two keys are included.

The main difference between RJ11 and RJ12 connections for cash drawers is the number of pins. RJ11 has 4 pins, while RJ12 has 6 pins.

Most High End Cash drawers use an RJ12 connection because they need at least 5 pins to communicate. The extra, 6th pin, on the RJ12 connector is used for a status signal, which tells the POS system when the cash drawer is open or closed. RJ11 and RJ12 are physically compatible to the same fitting.
